You can admire
trends – or make
them your own.

Milano Collection

Unique and yet for everyone: Not only Fundermax is growing from year to year, but also the market for a number of the latest product and surface innovations. The exclusive Milano collection is now available not only for the furniture industry, but for everyone.

In addition to the high-quality carrier panels Star Favorit and Max HPL, the focus of this collection is on the trend towards sustainability. This leads to a more conscious life, also in the areas of interior design and your own four walls. From woods to stones to linen structures: Decors that look natural in combination with authentic surfaces ensure elegance, aesthetics and a unique atmosphere in every room.

Star Favorit

The coated chipboard panels are particularly popular because of their diversity. From kitchen fronts to living room furniture to constructions especially for trade fairs and shop fittings: The applications are as individual as the design options. The special features of the Star Favorit product range include well thought-out differentiations such as chipboard with a one-sided coating or with an aluminum coating.

Max HPL

Max HPL are duromer high-pressure laminates in accordance with EN 438-3, type HGS and are ideal for decorative and high-traffic areas of application (e.g. furniture, interior design, etc.). They are perfect for such applications as they are highly resistant to abrasions, impacts, scratches and heat.

Surfaces

NICE

Matt and glossy light reflections lead to the look of thermo-treated wood. The elegant design harmonizes particularly well with wood or plain decors.

IMMAGO

High-contrast matt and gloss effects make this surface a convincing reinterpretation of concrete structures with a warm, pleasant feel.

PORE MATT

A matte surface that conveys the warm appearance of natural wood. In combination with classic, light woods and typical wood pores, it corresponds to the trends of modern interior design.

MITO

Based on the "Natural" trend, this surface with its distinct texture ensures a harmonious appearance and a convincing feel. Ideal for fresh, light-colored wood.

REAL MATT

A matt surface with an extremely realistic color that is ideal for light stone decors and lends them authenticity and elegance, both visually and haptically.

TEXTA

A newly developed surface that creates amazing visual effects with slight depressions and matt and shiny grooves. Ideal for wood and textile decors and warm color combinations
