### The Story behind

The sustainable trend is toward more conscious living within one's own four walls. Interior thereby gets a higher visual value.

The inspiration for tomorrow's living is created by balancing the haptic need to be emotionally and physically reconnected with nature.

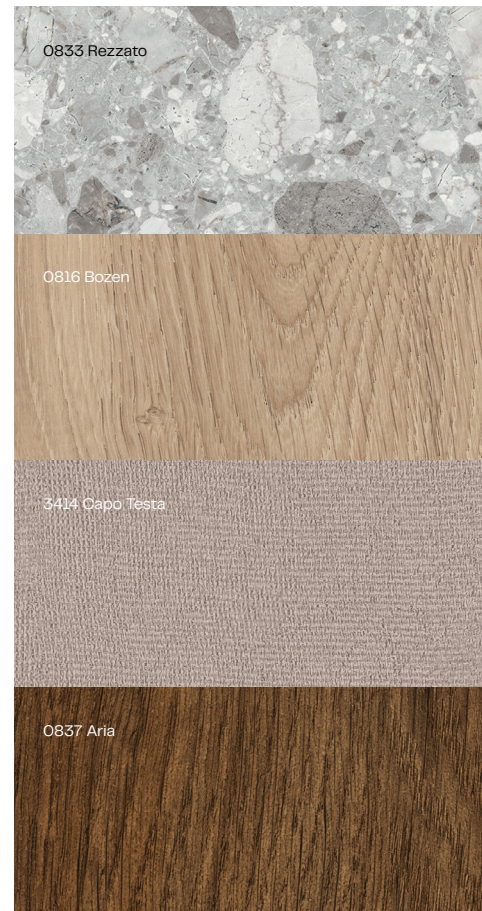

The focus is on haptic surfaces interacting with inspiration as well as decor essence.

„0837 Aria“ and „0816 Bozen“ are not the typical oak wood, but captivate with their subtle – natural and dynamic – modern character. The special feature in the appearance is characterized by the play of colors and the unobtrusiveness of the pattern.

The varied play of colors gives the „0833 Rezzato“ a modern appearance and makes the classic terrazzo look young and powerful again. The surface is visually and haptically underlined by the elegance of Real Matt (RM).

With its fine intersecting lines, the linen-like structure of „3414 Capo Testa“ presents itself as an absolute decor highlight.

Lovely details combined with a two-dimensional long-distance effect as well as effectively pleasant for stones and woods.
